

What is Telehealth Withdrawal Treatment?

Mindful Recovery telehealth supported withdrawal treatment is individualised with the person and Nurse Practitioner to complete in their own home.

The Nurse Practitioner prescribes all medications required for a transparent withdrawal and maintenance therapy (if required).

The Nurse Practitioner consults with the individual to review withdrawal symptoms & medications throughout the treatment plan as required.

The Nurse practitioner prescribes the appropriate medicinal cannabis product/s in consultation with the client.

The journey through Mindful Recovery includes comprehensive assessment, treatment planning, medication prescribing, pathology requests/reviews, alcohol and drug/s withdrawal maintenance, referrals for psychiatric assessment, counselling, psychology, private & public inpatient treatment centres & prescribing medicinal cannabis as a treatment preference.
